

IMPLEMENTING WEB APPLICATION

DATE	30 October 2022
TEAM ID	PNT2022TMID34259
PROJECT NAME	CUSTOMER CARE REGISTRY

CREATING UI TO INTERACT WITH APPLICATION:

The screenshot shows a web browser window with a single tab titled 'HOME'. The address bar displays '127.0.0.1:5000'. Below the browser window, the main content area of the web application is visible. It features a heading 'HOSPITAL HOME PAGE' and a sub-heading 'Hospital Chatbot is embedded to provide answers to queries'. Below this, there are two instructions: 'Click the icon in bottom right corner to open chatbot' and 'Type 'Hi' to begin the conversation'. On the right side of the page, there is a chatbot interface titled 'Watson Assistant'. The chatbot has a home icon and a title 'Watson Assistant'. The chat history shows a greeting: 'Hello, this is your hospital chatbot. How can I help you?'. Below this, there is a question: 'Have you been to this hospital before?'. There are two buttons: 'Yes' and 'No'. Below the buttons, there is a text input field with the placeholder 'Enter your OP number'. At the bottom of the chatbot interface, there is a text input field with the placeholder 'Type something...'. Below the chatbot interface, there is a footer that says 'Built with IBM Watson®'.
